

ASTAMAREMMA

Hypermaremma is pleased to present the Hypermaremma 2023 fundraising auction that will be held on **Saturday, September 17th, 2022, at Circolo La Macchia in Capalbio**, in collaboration with **Sotheby's**. The event is organised as part of the Association's cultural programme in order to help support its activities in the next edition.

This latest edition of Hypermaremma stood out from the previous ones for a programme that involved an even larger portion of territory from Pescia Fiorentina to Talamone, involving not only Italian artists of different generations, but also recognised international personalities who, by relating and engaging in an active dialogue with the territory and the local community, contributed to the recognition of the Maremma area as a cultural and artistic epicentre in constant growth and development. The site-specific environmental interventions and performances presented during the fourth edition were received with great enthusiasm by the local, national, and international press, as well as by an ever-growing audience from all over the world.

The ongoing growth of the Festival has encouraged us to imagine even more ambitious and challenging projects for the fifth edition, both artistically and economically.

Considering the success of the previous year, we have also imagined setting up a fundraiser for the year 2022 that can partially support us and contribute to the realisation of future projects. For the occasion, the prestigious auction house *Sotheby's* is generously bringing its world-renowned reputation and experts to support Hypermaremma and its future goals.

During the auction, works of art of acknowledged value, conceived and created by notable contemporary artists, will be auctioned off.
